

This section describes how to view a main account's credit balance using the API-N Credit Check API.

`http://orgds.org/api?cmd=balance&username=xxxxxx&password=xxxxxx`

API-N Credit Check Parameters

Response Message

When a successful Credit Balance call is made, the response will be a numeric credit balance of the main account. For example,

1234.12

If any error occurs, the error code and message will appear instead. [See possible error codes here.](#)

Sample API-N Credit Check PHP Code

```
<?php
    //Check SMS Credit Balance of a main account
    $username = "username";
    $password = "password";
    $balanceUrl = "https://orgds.org/api?cmd=balance" .
"&username=".$username . "&password=".$password;

    if ($reply = file_get_contents($balanceUrl)) {
        echo $reply; //reply will be numeric credit balance on
the user's account
    }
?>
```
